PROJECTS

KrishiDrishti – Smart Farming Assistance System

feb - 2026

- Developed an AI-powered **Crop Recommendation Engine** based on soil, climate, and profit factors.
- Integrated **Gemini Vision API** for crop disease detection and **Groq LLM API** for multilingual agricultural assistance (English/Marathi).
- Implemented **real-time features via external APIs**: weather, mandi price tracking, outbreak alerts, and government scheme discovery.
- Built **secure REST APIs** (Spring Security, JWT, Spring Data JPA, MySQL) supporting responsive React dashboards.
- Tech Stack**: Spring Boot, Spring Security, JWT, MySQL, React, Gemini API, Groq API.

AI-Powered Shopping Assistant (ShopBot)

may - 2026

- Developed a **microservices-based AI shopping assistant** using Spring Boot, Spring AI, and PostgreSQL, enabling conversational shopping workflows.
- Engineered **LLM-powered tool calling** for product search, cart, inventory, checkout, and automated invoice generation.
- Implemented **MCP Server-Client architecture (using SSE)** to link AI models with database-backed business services.
- Integrated Llama 3.3/Groq APIs** via spring AI for converting natural language into transactional e-commerce actions.
- Tech Stack**: Spring Boot, Spring AI, MCP, PostgreSQL, Groq API (Llama 3.3)

Technical Skills

- Programming Language - Java, JavaScript
- Framework/Libraries - SpringBoot, Spring Security, Spring WebFlux(WebClient), React
- Database - MySQL, PostgreSQL
- AI & API Integration - Spring AI, Model Context Protocol (MCP), Google & Groq api's

EDUCATION

Qualifications	University/Boards	Year Of Passing	Grade
B.E.(Computer Science)	SGBAU	2027	6.85
HSC	State Board	2023	65%
SSC	State Board	2021	87%

ACHIEVEMENTS

- Awarded 1st Place at BNCOE Hackathon.
 - Participated in National Level Hackathon.
 - Recognized as Player of the Tournament in Division Cricket matches.
- may-2026
March - 2026
